

Maryland health care company expands in San Antonio

Business Journals

HealthCare Resolution Services Inc. expanded its presence in San Antonio by opening a new regional office that oversees a staff of more than 200 health care professionals.

The Laurel, Md.-based company will now provide day-to-day technical and professional consulting services and guidance to many government clients. The local office will provide medical records coding, compliance and auditing services to its clients.

The company is also providing support to area clients that conduct clinical research and feasibility studies, monitor data quality, audit-based provider training and manage health care staffing services.

The office will also serve as the primary point of contact and liaison for their clients' external constituencies.

"Our new office is a direct result of how quickly HCRS is growing and indicates the depth of the support we provide to our federal commercial clients," HealthCare Resolution Services CEO Jarvis Doles says.

HealthCare Resolution Services specializes in project management, data abstraction, quality assurance, business process improvement training and staffing services to public and private clients in the health care industry.
